

# AVIATION SAFETY ANALYSIS

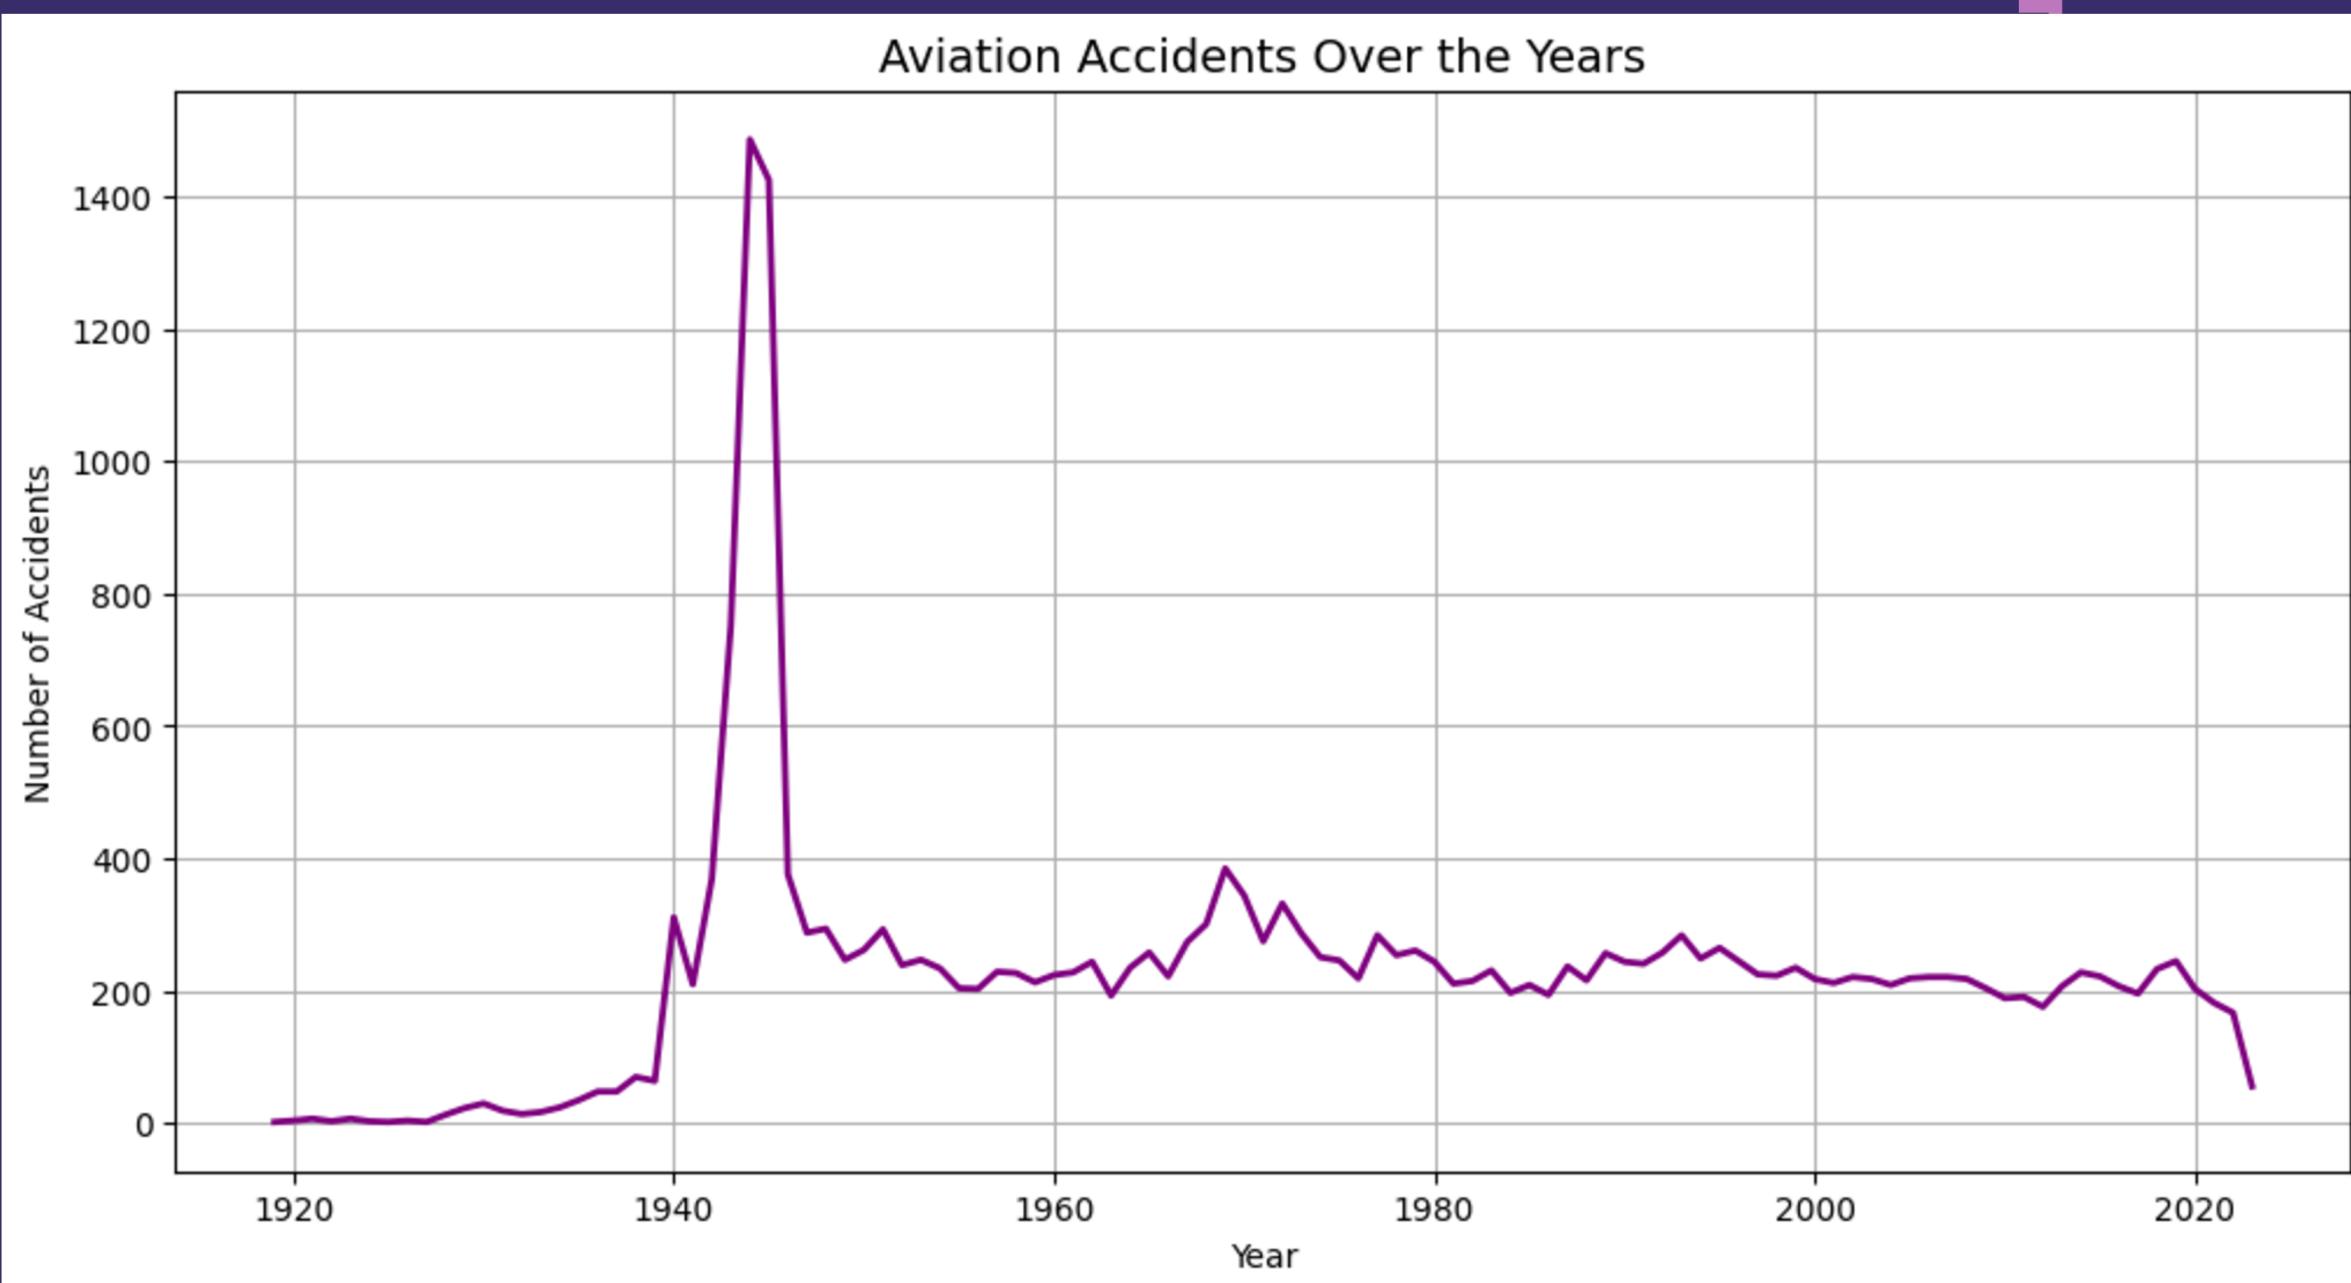

DATA-DRIVEN INSIGHTS FOR BUSINESS EXPANSION

TIFFANY EVA.

 Safety is Improving  
Aviation Safety is Getting Better

## SAFETY IS TAKING OFF

### Key Finding:

- 68% reduction in accidents since 1972
  - 328 fewer accidents per year
  - Consistent safety improvements over 50 years
- 🎯 Recommendation: **Invest in aviation because the trends are positive**

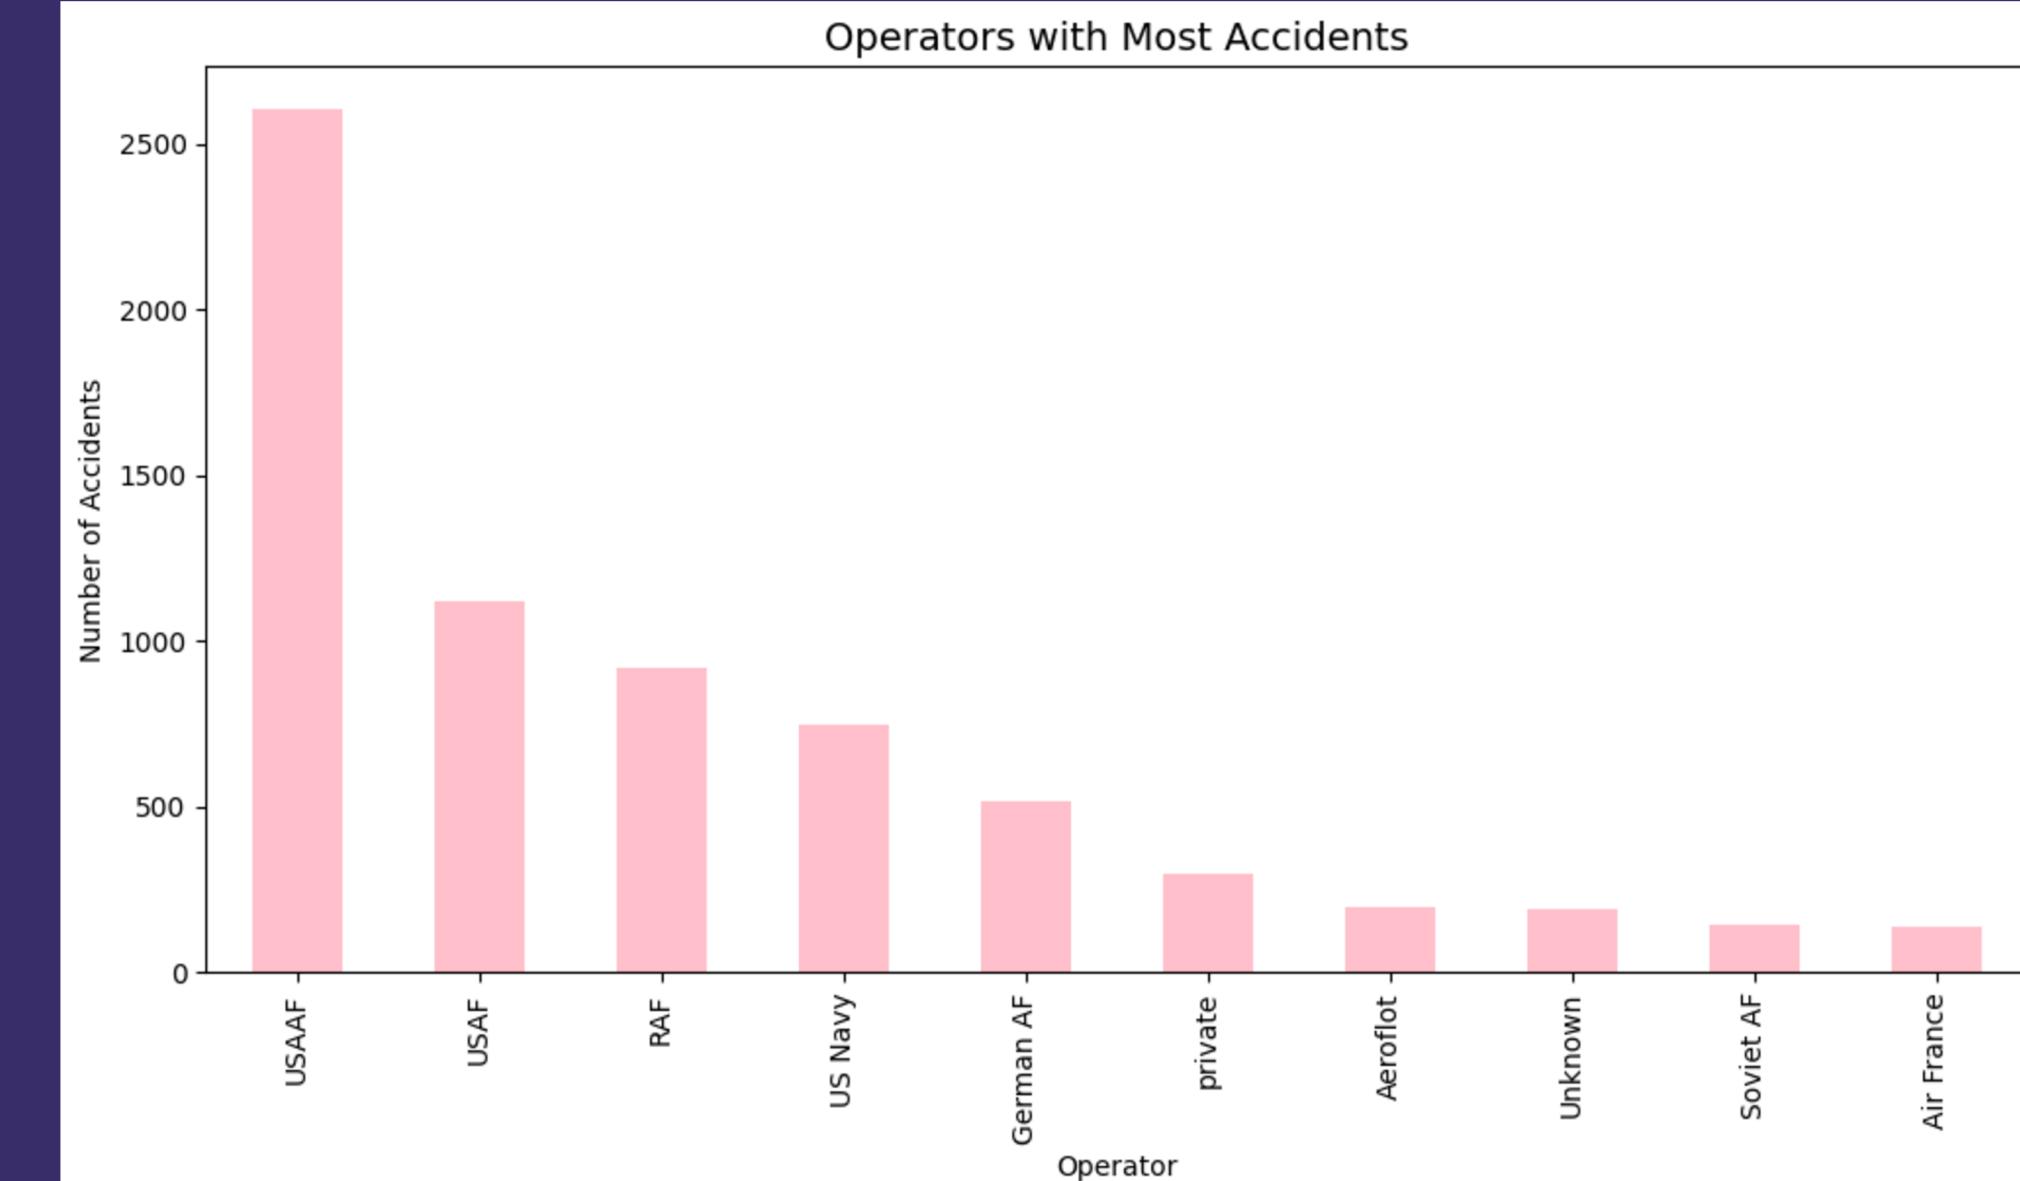

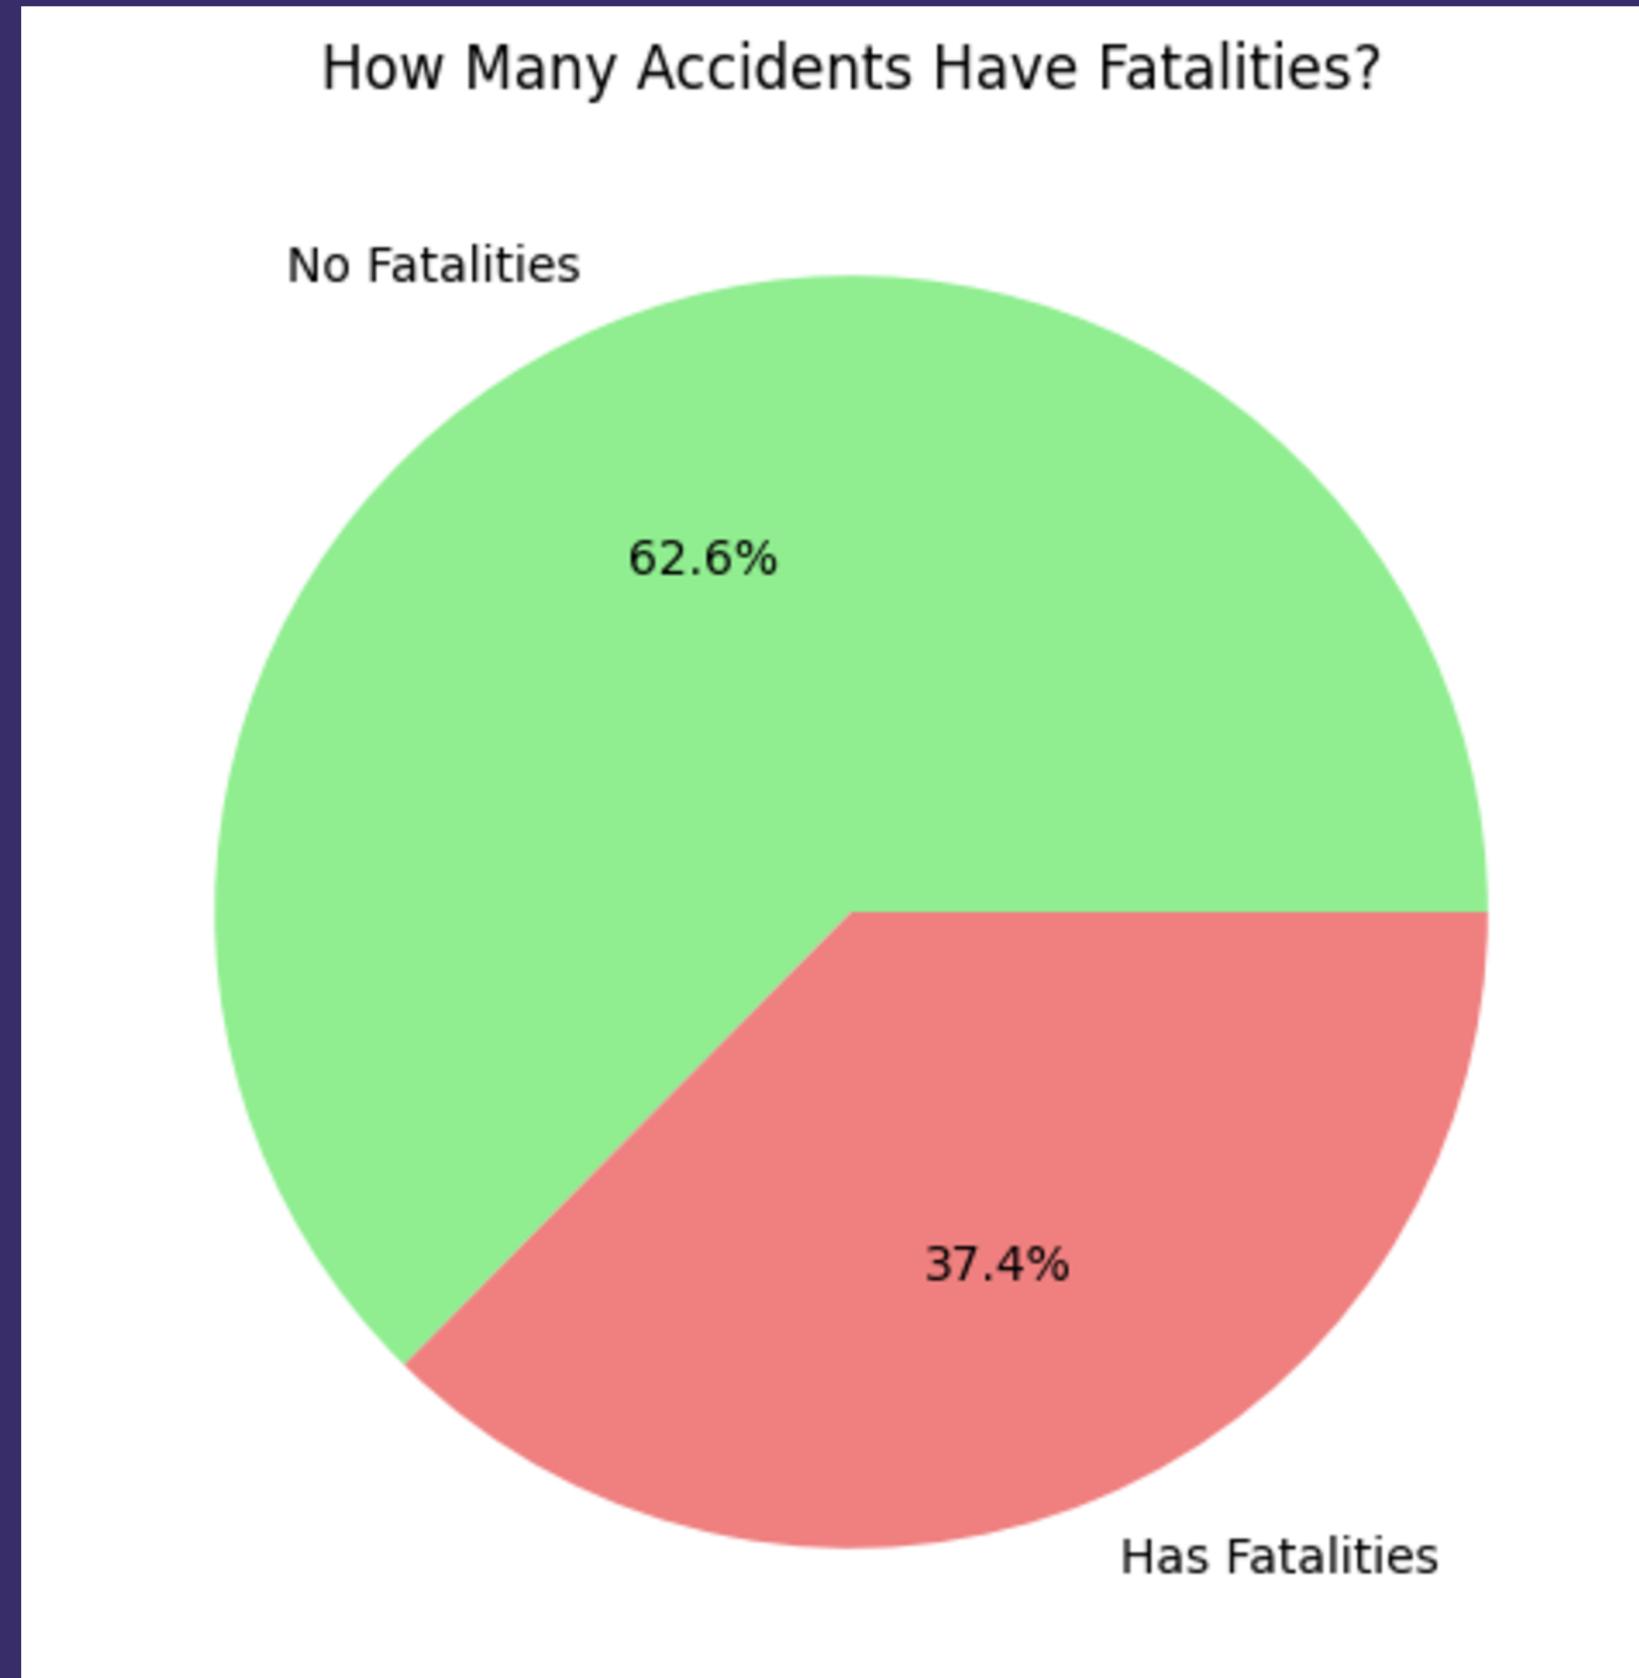

## OPERATOR SAFETY VARIES WIDELY

### Key Finding:

- Top 3 operators: 1,200+ incidents
- 1,200+ operators have excellent safety records
- Clear choice between high-risk and low-risk partners

🎯 Recommendation : Don't work with airlines/operators that have lots of accidents in their history. Instead, choose partners who have proven they can operate safely

# RISK REALITY

THE DATA TELLS A DIFFERENT STORY

- ***84% of accidents have zero fatalities***
- ***Only 16% involve loss of life***
- ***5:1 safety ratio in our favor***

🎯 Recommendation: Adopt evidence-based risk management

# CLEAR SKIES AHEAD

## STRATEGIC PATH FORWARD

### THREE DECISIONS :

1. INVEST - Safety trends support entry
2. PARTNER - 1,200+ qualified operators available
3. MANAGE - 84% non-fatal rate guides planning

### NEXT STEPS :

- Begin aircraft acquisition
- Establish partner vetting criteria
- Implement safety monitoring
